## ERGOSAFE & INNOVATION

Innovation is essential to ErgoSafe. We have developed a completely new balustrade system adaptable for both ground-level and balcony installations. ClickitUp® by ErgoSafe is an innovative glass balustrade system offering multiple features that combine safety, design, and functionality into a sustainable concept for all types of outdoor environments.

## SWEDISH & SUSTAINABLE

ErgoSafe, founded in 1996 in Halmstad, is a Swedish company with its own factory, ensuring high-quality glass balustrades crafted by our skilled team. We operate in highly modern facilities, utilize recyclable materials, and prioritize sustainable choices. Our goal is continuous improvement and a commitment to both the environment and people.

## QUALITY & SAFETY

We highly value quality and safety. Our diverse product groups impose strict demands on us as a supplier. Demands we consider fundamental to meet and uphold on a daily basis. Our products undergo extensive testing and inspections to comply with legal requirements and product specifications.

**Designed and manufactured in Sweden.** ErgoSafe's glass balustrade marketed under the ClickitUp® brand is design protected through: EU 002416248-0001-0005 (March 2014), GB 90024162480001-0005, EU 015096653-0001-0002, GB, NO DM/2513503. The design protection means that no other party within the EU, the United Kingdom or Norway has the legal right to manufacture, sell or import copies of ErgoSafe's glass balustrades.

## WEATHER PROTECTION IN GLASS FOR OUTDOOR SEATING AREAS

On hotel and restaurant patios, glass balustrades and wind protection systems face tough challenges. They must withstand both wind and weather to ensure year-round usability. This makes choosing the right products crucial.

Our extensive experience and comprehensive reference list testify to our expertise. Together with our partners, we offer guidance and support throughout the entire process. We deliver durable, reliable products that enhance outdoor spaces, making them safer and more inviting, whether for ground-level installations or balcony applications.

Welcome to contact us today!

Height-adjustable glass balustrades

- + Maximize outdoor seating capacity
- + Adapt the wind protection to weather
- + Create a long and safe outdoor season

ClickitUp is the original model of our glass balustrades with a free glass edge and a height-adjustable function.

Through continuous product development, we now offer several height-adjustable models adapted to different outdoor environments and needs.

Our height-adjustable glass balustrades feature an elegant and functional design, creating a wind-protected, stylish and welcoming oasis for restaurant outdoor seating.

## CiUFixed, CiUFixedBalcony

Glass balustrades

- + Ready-to-install sections
- + Combine with ClickitUp
- + Smooth installation

Our Fixed models are sleek glass balustrades in standard height that meet the requirements for safe installation. CiUFixed and CiUFixedBalcony are easy to install and can be combined with our height-adjustable models.

For outdoor seating areas where wind protection is not required, a fixed glass balustrade is the natural choice for a clean and stylish overall design. The Fixed models are also particularly easy to install.

<b>Category</b>	Glass balustrades
<b>Description</b>	Sleek fixed-height glass balustrades that frame outdoor seating areas and are easy to install
<b>Products</b>	CiUFixed, CiUFixedBalcony
<b>Safety</b>	Designed with safety glass
<b>Placement</b>	The choice of model depends on whether there is a risk of falling or not

# CiUWindscreen

## Windscreen

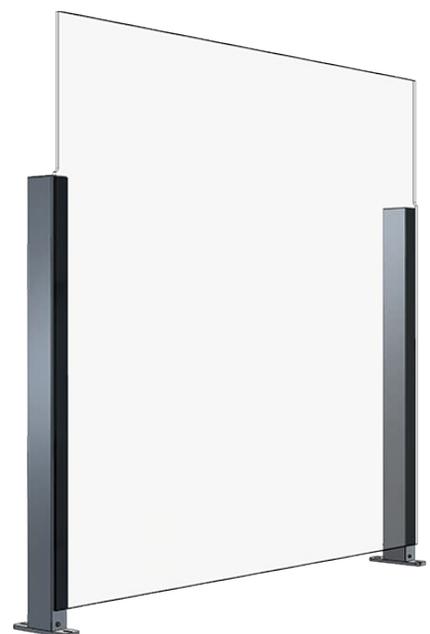

- + Smart outdoor wind protection
- + For a calm outdoor space
- + Delivered ready to install

CiUWindscreen is our tall, fixed glass balustrade that provides effective wind protection while preserving the view. The high glass sections can easily be combined with other models in the ClickitUp series for a flexible and uniform overall solution.

With its robust and sleek construction, CiUWindscreen creates a stable and discreet wind protection that enhances comfort on restaurant outdoor terraces.

<b>Category</b>	Windscreen
<b>Description</b>	Windscreen providing effective wind protection while preserving the view
<b>Products</b>	CiUWindscreen
<b>Safety</b>	Designed with safety glass
<b>Placement</b>	The balustrade must not be installed where there is a risk of falling

# ClickitUpPlus

Adjustable glass panel system

- + Weather protection all year round
- + Raise or lower for shelter or breeze
- + Weather-protected with pergola

ClickitUpPlus is a glass system with fixed upper and lower glass panels and a height-adjustable glass section in the middle. With a simple hand movement, the movable middle section is lowered to open up the enclosure.

This design provides a flexible all-in-one solution with year-round comfort and creates a protected, stylish, and pleasant environment for restaurant outdoor seating. ClickitUpPlus is specially adapted for roof installations such as pergolas. A matching pivot door is available.

## CiUFlex, CiUFlexBalcony

Upgradeable glass balustrades

- + Upgradeable with wind protection
- + Combine with adjustable models
- + Lower initial cost

Our upgradeable glass balustrades are based on an innovative design and are prepared for upgrade with an upper movable glass panel. This allows the fixed and movable sections to be ordered at different times.

The retrofit installation is quick and easy to carry out, and once completed, the upgradeable glass balustrades have the same finish and appearance as our height-adjustable glass balustrades.

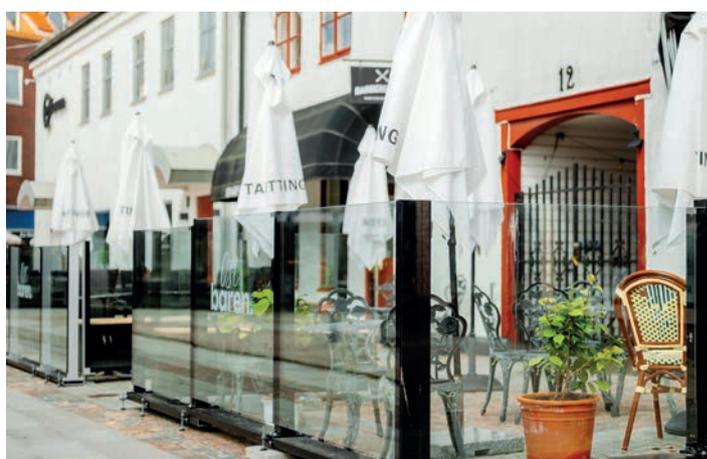

<b>Category</b>	Upgradeable glass balustrades

## Free Standing

Free standing glass balustrades

- + Glazing without ground anchoring
- + Combine with bench or planter
- + ClickitUp® design & build

Free Standing consists of freestanding sections where a planter box or bench is combined with ground-level glass balustrades. As the sections are supplied with skids or wheels, positioning and installation at ground level are flexible and easy. The system requires no ground anchoring.

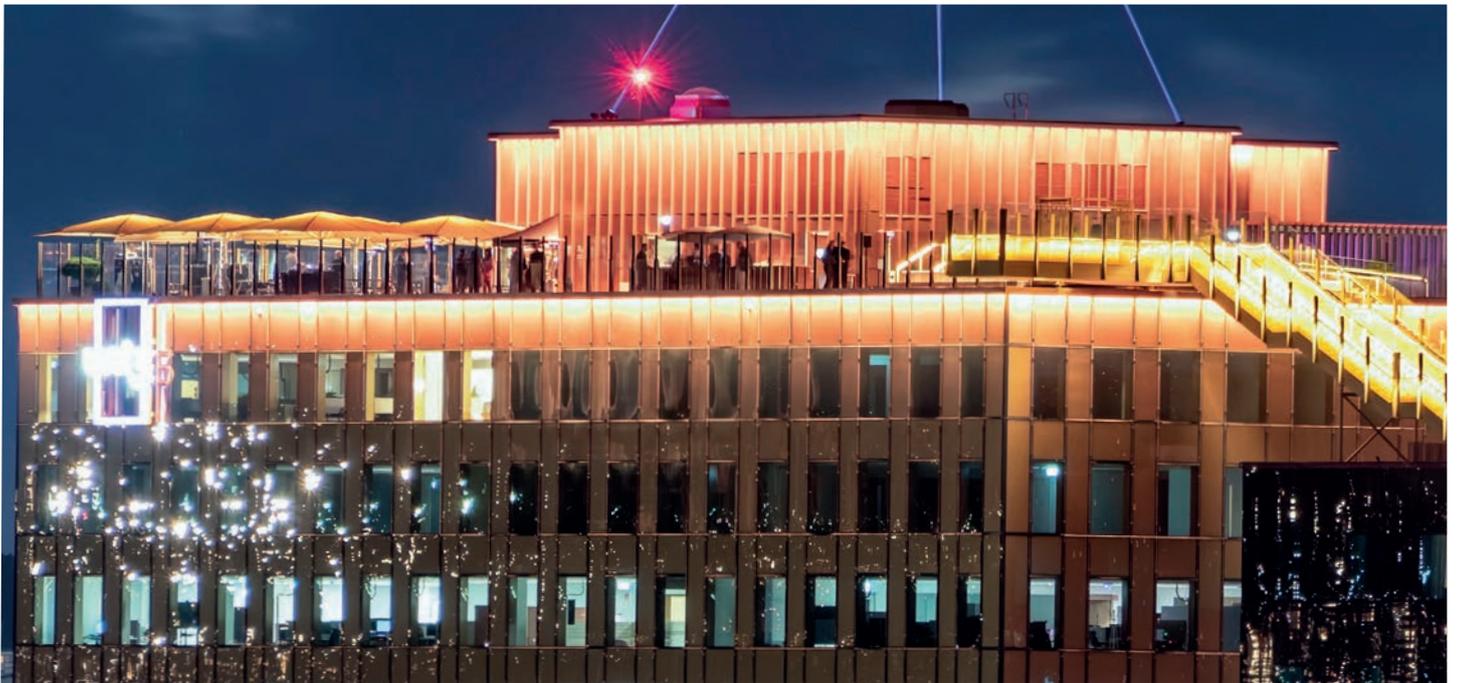

Our freestanding glass balustrades create a functional, stylish, and pleasant outdoor environment for restaurant terraces, with effective screening and high comfort.

<b>Category</b>	Freestanding glass balustrades
<b>Description</b>	Freestanding planter box or bench combined with a glass balustrade for ground level
<b>Products</b>	ClickitUp Free Standing, CiUFixed Free Standing, CiUWindscreen Free Standing
<b>Placement</b>	Adjustable runners or wheels for installation at ground level
<b>Material</b>	Glass, aluminium, stainless steel and galvanized steel
<b>Surface treatment box</b>	Standard: Black powder coating in RAL 9005 Optional: Powder-coated in any custom color
<b>Height with CiUFixed</b>	1152 - 1242 mm with skids and 1240 mm with wheels
<b>Height with CiUWindscreen</b>	1552 - 1642 mm with skids and 1640 mm with wheels
<b>Height with ClickitUp</b>	1952 - 2042 mm with skids and 2040 mm with wheels
<b>Standard width</b>	1000 mm, 1500 mm and 1800 mm
<b>Custom width</b>	500 mm - 2000 mm
<b>Depth</b>	495 mm
<b>Seat depth (bench)</b>	400 mm

**Build a section with planter box or bench**  
Choose either a planter box or bench and decide if the section should have adjustable skids or wheels. Finally, select the ground-level glass balustrade variant that best suits your project.

**OUR GLASS BALUSTRADES**

*Elegant glass weather protection – ideal for outdoor seating areas*

## CLICKITUP BY ERGOSAFE - THE FLEXIBLE GLASS BALUSTRADE SYSTEM

We offer several variants of glass balustrades, tailored for both ground-level and balcony installations. With a wide selection of accessories and mounting details, we provide the market with a flexible balustrade system that suits various needs and environments. With ClickitUp® by ErgoSafe, you get a durable, functional, and sleek solution that creates a safe and attractive outdoor space for your guests, while also offering the opportunity to maximize seating capacity for the restaurant.

### FLEXIBLE DESIGN FOR ALL OUTDOOR ENVIRONMENTS

For our ground-level glass balustrades, additions such as a planter box or bench can be incorporated, creating freestanding sections that do not need to be anchored to the ground. Multiple sections can be combined to form a completely freestanding barrier, ideal for creating a flexible and private outdoor seating area. On rooftop terraces, the system adds both safety and aesthetic elegance, making the outdoor environment both attractive and functional.

### THE FLEXIBLE WIND PROTECTION FOR OUTDOORS SEATING

The height-adjustable glass balustrade ClickitUp is the perfect choice for the HORECA segment and outdoor seating areas, whether the installation is at ground level or on a rooftop terrace. With its height-adjustable feature, ClickitUp offers both flexibility and comfort for guests. The glass balustrade can be easily adjusted to protect against wind and weather, allowing the outdoor seating area to be used year-round without compromising the view or atmosphere.

We manufacture glass balustrades in both standard and custom dimensions, tailored for outdoor seating areas. All our glass balustrades can be combined and customised according to the needs of the business and the conditions of the outdoor environment. Below you will find an overview of our different models.

With our extensive experience in glass and aluminium, we help you create a safe, flexible, and stylish outdoor seating area that maximises both comfort and capacity. We guide you through the entire process – from concept and design to finished installation.

*Welcome to contact us for advice and support for your outdoor seating area!*

## Height-adjustable glass balustrades

With our height-adjustable glass balustrades, you get protection from the wind and can enjoy a longer outdoor season. Raise the wind protection while preserving the view.

## Glass balustrades

Our Fixed models are sleek glass balustrades in standard height that meet the requirements for safe installation. The fixed glass balustrades are easy to install and can be combined with our height-adjustable models.

## Windscreen

A sleek windscreen that provides effective wind protection without compromising the view. The sections can be combined with our other models in the ClickitUp series.

## Adjustable glass panel system

Together with a fixed roof, such as a pergola, and a pivot door, a stable and flexible glazing solution is created with complete weather protection all year round. The middle section is easily raised and lowered as needed.

## Upgradeable glass balustrades

Our innovative design gives you full flexibility. Start with a fixed glass balustrade and add a height-adjustable section later. A cost-effective initial investment that can easily be upgraded.

## Freestanding glass balustrades

Free Standing requires no ground anchoring. Combine a planter box or bench with any ground-level glass balustrade from our ClickitUp® system for a flexible solution that creates a functional and stylish outdoor environment.
